

we are family

## Congratulations on your new Medicaid coverage

Now is the time to take the first step toward a more healthy future.

When your family comes to our clinic, a “care team” of professionals will work with you to maintain and improve your overall health. Your care team is made up of providers, nurses, behavioral health specialists, nutritionists and others.

### Don't wait until you're sick to call

Regular preventive services—like flu shots and immunizations—help you avoid illness. It's our goal to do everything we can to ensure you stay healthy by preventing illness and disease in the first place.

### Avoid unnecessary and expensive trips to the Emergency Room

The emergency room is for sudden or severe conditions that need care right away. Calling your provider when you begin to feel sick may reduce the length and severity of your illness. After all, your provider better understands your health history, prescription history, and medical needs.

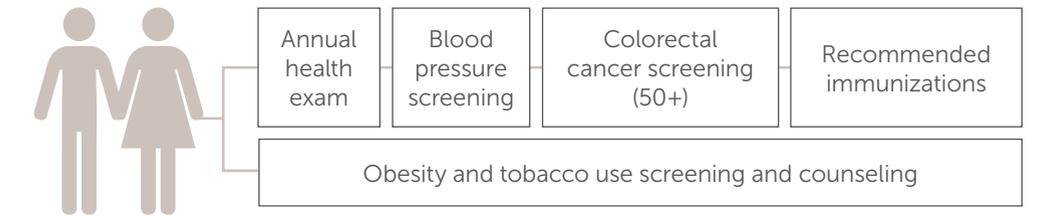

**If your illness or injury appears life threatening call 9-1-1 or go to an ER right away!**

**Visit [yvfwc.org](http://yvfwc.org) or call 800-957-9696 to find a clinic near you.**

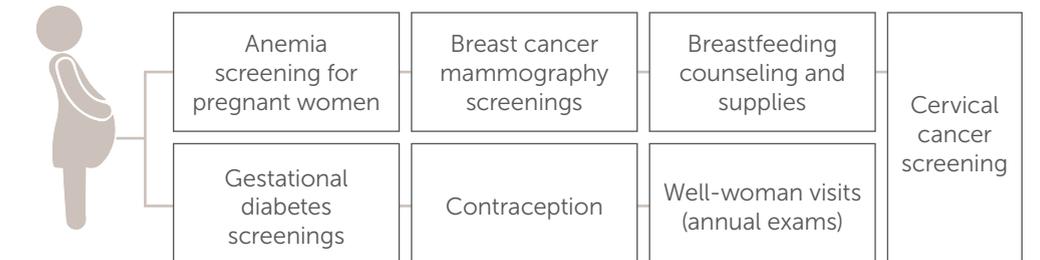

Here are just a few of the services you get with your new Medicaid coverage at **NO COST TO YOU.**
